**Project Introduction:**

Through, Rwanda Ideas Hive has the purpose of sustaining communities such as (schools, churches) and the population in general for food security and environment protection through local actions. Community meetings will bring diverse stakeholders together for awareness of the importance of Rwanda Ideas Hive in hung fighting, climate change mitigations, and environmental conservation. The meetings will be held to engage a wide audience in information sharing and discussions on different things.

**Objective 1: Introduction projects to community**

- Goal 1A: increase awareness of issues regarding pollution, environmental injustice, and climate change.
- Goal 1B: to establish people to come together to express their opinions regarding the most pressing environmental issues impacting their families and neighborhoods.

**Objective 2: provides all participants a chance to voice their concerns or ideas.**

- Goal 2A: Ability for stakeholders to listen to and talk to each other and have open discussions in a safe space. .
- Goal 2B: to attract more members and mobilize volunteers to educate these community leaders about the United Nations Sustainable Development Goals and commit to climate action.

**Objective 3: dissemination detailed information and decision through the community**

- Goal 3A: the findings from small meetings can be presented at large public meetings once the followership increases and more members are involved.

### Project Outcomes:

The project outcomes, we all know how life would look if there were no trees, plants animals one that the planet is a living place. After the projects, the people or community will be able to maintain and conserve the environment. The community will know that the environment is necessary for us to live and know to prevent being polluted daily. Community will participate in disseminating environmental and sustainable development messages at the national and international levels.
